

Strength you can depend on

The leading manufacturers
of polyurethane adhesives
and coatings

{A bond for life}

{ A bond for life }

Leeson Polyurethanes are the leading innovators and manufacturers of Polyurethane Adhesives and Coatings, supplying worldwide.

Did you know?

The talented team at Leeson Polyurethanes can manufacture bespoke PU products to perfectly suit your requirements. Whether you require a liquid adhesive, our reactive PUR Hot Melts, or a product made especially for your industry: Leeson Polyurethanes can produce it.

We develop and manufacture an extensive range of formulated polyurethane products:

- 1 and 2 component 100% Solvent Free Adhesives
- Polyurethane Textile Adhesives
- Spray and Hand Applied Polyurea
- Waterproofing Systems for Roofs & Balconies
- Polyurethane Binders for Playgrounds & Sports Pitches
- Polyurethane Coatings
- Decorative Coatings
- Seamless Industrial Flooring
- PUR Reactive Hot Melts

We work closely with our customers to deliver formulated polyurethanes of the highest quality. Our products are tailored for our customer's precise requirements ensuring that they perform at their best.

The applications are infinite, from insulated panel production to textile and kitchen pad lamination, from sports pitches and playgrounds to high friction surfaces.

ADHESIVES

Strong, durable and long-lasting Industrial Adhesives have a multitude of applications for our customers.

Polyurethane Adhesives are commonly utilised in the production and manufacture of panels; ranging from insulated and vehicle panels, to panels for use in cold storage and flooring. Textile Adhesives are used to laminate flexible foams, domestic scourers, automotive trim, intimate apparel, garment textiles; an unlimited list of applications.

Industrial Adhesives have multiple uses on building sites for the construction industry. Hard-wearing products for tough jobs.

Our Adhesives can withstand extremes of temperature, exposure to oil, water, acids and alkalis: whatever you throw at them, our resilient products stand up to the job.

We are constantly innovating with our hard-wearing, flexible products that can be applied in a wide range of settings; in fact, you are never far away from our products.

COATINGS

Our innovative Polyurea and Polyurethane Coatings are used in a wide range of applications.

We are continually developing our coatings to meet the requirements of our customers.

Liquid Applied Protective Coatings are based on polyurea and polyurethane technology.

Applications include concrete protection, steel protection, waterproofing and scenography for films.

Rubber Crumb Polyurethane Binders used in sports pitches and playgrounds give excellent tensile and elongation properties to conform to BS7188:1998; as well as resistance to extremes of temperature. We manufacture binders for both pour-in-place and tile production, with grades suitable for both hand and machine installation.

Anti-Skid Coatings reduce the risk of accidents when applied on roads, bridges, marine applications, cycle routes and pedestrian areas.

The High Friction Surfacing Coating System is a two component polyurethane coating for binding aggregate to a road surface where high friction is required.

Polyurethane Coatings are used to bind decorative aggregates such as pathways, drives, and car parking. Porous, and therefore SUDS compliant, they also give an attractive hard wearing surface.

Leeson Polyurethanes Paints are ideally suited for use as anti-slip floor coatings in areas of light traffic.

These two component 100% solvent free polyurethane and polyaspartic coatings can be applied to firm, level surfaces with and without an anti-slip aggregate.

INNOVATION

Our Polyurethane products are developed and manufactured to the highest quality with our customers at the forefront.

Leading the way in both supply and innovation, Leeson Polyurethanes are continually refining and reinventing our products to meet our customer's requirements for durable, longlasting and flexible polyurethane products.
